## CV

### David Gray

#### Introduction

David brings a wealth of supervisory management and logistics experience to the team, providing project management and liaison skills with specialist knowledge of healthcare relocations and refurbishment programmes. David has been the senior project manager on several prestigious projects. His ability to work on large-scale programmes while remaining focused on the needs of the end user make him a valuable asset on any project

#### Project experience

##### University of Newcastle Medical Laboratories

Senior project manager for a 40 Research Laboratory's move within University of Newcastle Medical School, responsible for a busy team of project co-ordinators and associated cost management. Among a range of co-ordination activities, David's team undertook a high-volume extensive filing audit and migration of write-up rooms. David himself was directly responsible for co-ordinating specialist equipment transfers and subsequent recalibration to ensure minimum laboratory down time.

##### Baillie Gifford Investment Bank

Senior project manager for a 900-staff 4-into-1 move for Baillie Gifford, Edinburgh. David was responsible for a busy team of project co-ordinators and associated cost management. Among a range of co-ordination activities, David's team undertook a high-volume extensive filing audit and migration. David himself was directly responsible for co-ordinating specialist moves for dealer rooms and directors' suites.

##### Edinburgh Royal Infirmary:

Senior project manager for the relocation of 840 bed 5-into-1 hospital move over a three month period. Senior project co-ordination role, covering health records management, budget control, planning and resourcing the physical moves.
